NOTICE OF ALLOWANCE

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 11/12/2004 has been entered.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on November 12, 2004 was filed after the Notice of Allowance on 5/17/2004. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior arts of record taken alone or in combination fail to teach, anticipate, suggest or render obvious the claimed invention, as recited in the independent claims blow.

Claim 1 recites a method of performing parity operations in a redundant data storage system including the steps of pre-selecting parity coefficient subsets for use in

Art Unit: 2133

the different parity operations, storing all of the pre-selected parity coefficient subsets in a memory, determining which of the stored subsets of parity coefficients is needed for the particular parity operation, and performing the particular parity operation with the subset of parity coefficients that was read from the memory.

Claim 7 recites a method including the steps of forming groups of the subsets, calculating an offset in a linear memory array of a particular group group i corresponding to a subset size L_i in accordance with a predefined function of N and L_i , and reading a subset of values from the particular group at the calculated offset in the linear memory array.

Claim 10 recites a disk controller that performs parity operations in a redundant data storage system including memory for storing subsets of parity coefficients corresponding respectively to different parity-related computation scenarios, hardware parity computation logic configured to any particular parity-related operation by a scenario of the operation, reading the corresponding subset of parity coefficients from the memory, and performing the particular parity-related operation with the subset of parity coefficients read from the memory.

Therefore, claims 1-13 are allowed over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
